Dear colleagues,

For the first time in its history, Paris welcomes the annual conference of Wonca Europe. The French National College of Teachers in General Practice is proud to be hosting this great event.

The 2007 Wonca conference offers a window into the French and European health systems of Primary Care and the chosen theme "Re-Thinking Primary Care in the European Context - a new challenge for General Practice" offers the opportunity to analyse the different orientations that prevail throughout Europe and overseas.

The scientific program, built with the three Wonca networks: European General Practice Research Network (EGPRN), European Academy of Teachers in General Practice (EURACT) and European Association for Quality in General Practice/Family Medicine (EQUIP) reflects the high quality standards and diversity of Primary Care. Different health problems from preventive, curative to palliative care are covered.

The 4,200 attendees will enjoy a unique experience of sharing and discussing their diagnostic steps and therapeutic strategies with their counterparts as well as with key players in the field of Primary Care such as scientific societies, universities, research networks, the pharmaceutical industry, public health institutions, etc... Wonca Europe 2007, a source of inspiration from learning from each other and, let's not forget, a chance to discover or re-discover Paris, the eternal, the romantic, the creative... city of lights!

Le Collège National des Généralistes Enseignants (CNGE) accueille au Palais des Congrès de Paris plus de 4200 médecins généralistes français et européens dans le cadre du Congrès de la Wonca Europe 2007. La Wonca, association qui représente 45000 médecins généralistes en Europe est constituée de 4 réseaux : EGPRN pour la recherche, EURACT pour l'enseignement, EQUIP pour la qualité des soins et VASCO da GAMA Movement pour les juniors.

Ce grand rassemblement des professionnels de la Médecine Générale est une véritable vitrine de l'évolution de notre discipline. Plus de 1400 abstracts ont été enregistrés, proposés par des médecins généralistes de 53 pays sur les 5 continents.

L'ensemble des structures représentant la Médecine Générale en France, sociétés scientifiques et organismes de formation, participe activement à ce rassemblement, considéré également comme le 1^{er} Congrès National de la Médecine Générale.

Le congrès se réunit autour du thème principal "Re-Thinking Primary Care in the European Context".

Le programme scientifique reflète toute la diversité des soins primaires, du préventif au curatif et au palliatif, illustrant ainsi la polyvalence de la Médecine Générale, dans une démarche pragmatique, fondée sur des niveaux de preuve (EBM). Il permettra d'aborder les systèmes de soins primaires et la Médecine Générale dans sa globalité au travers des champs des soins, de la recherche et de la formation.
