# Round Table Seoul

WONCA World 2018

---

Point of view of GP / FD

---

# Context. Point of view of GP/FD

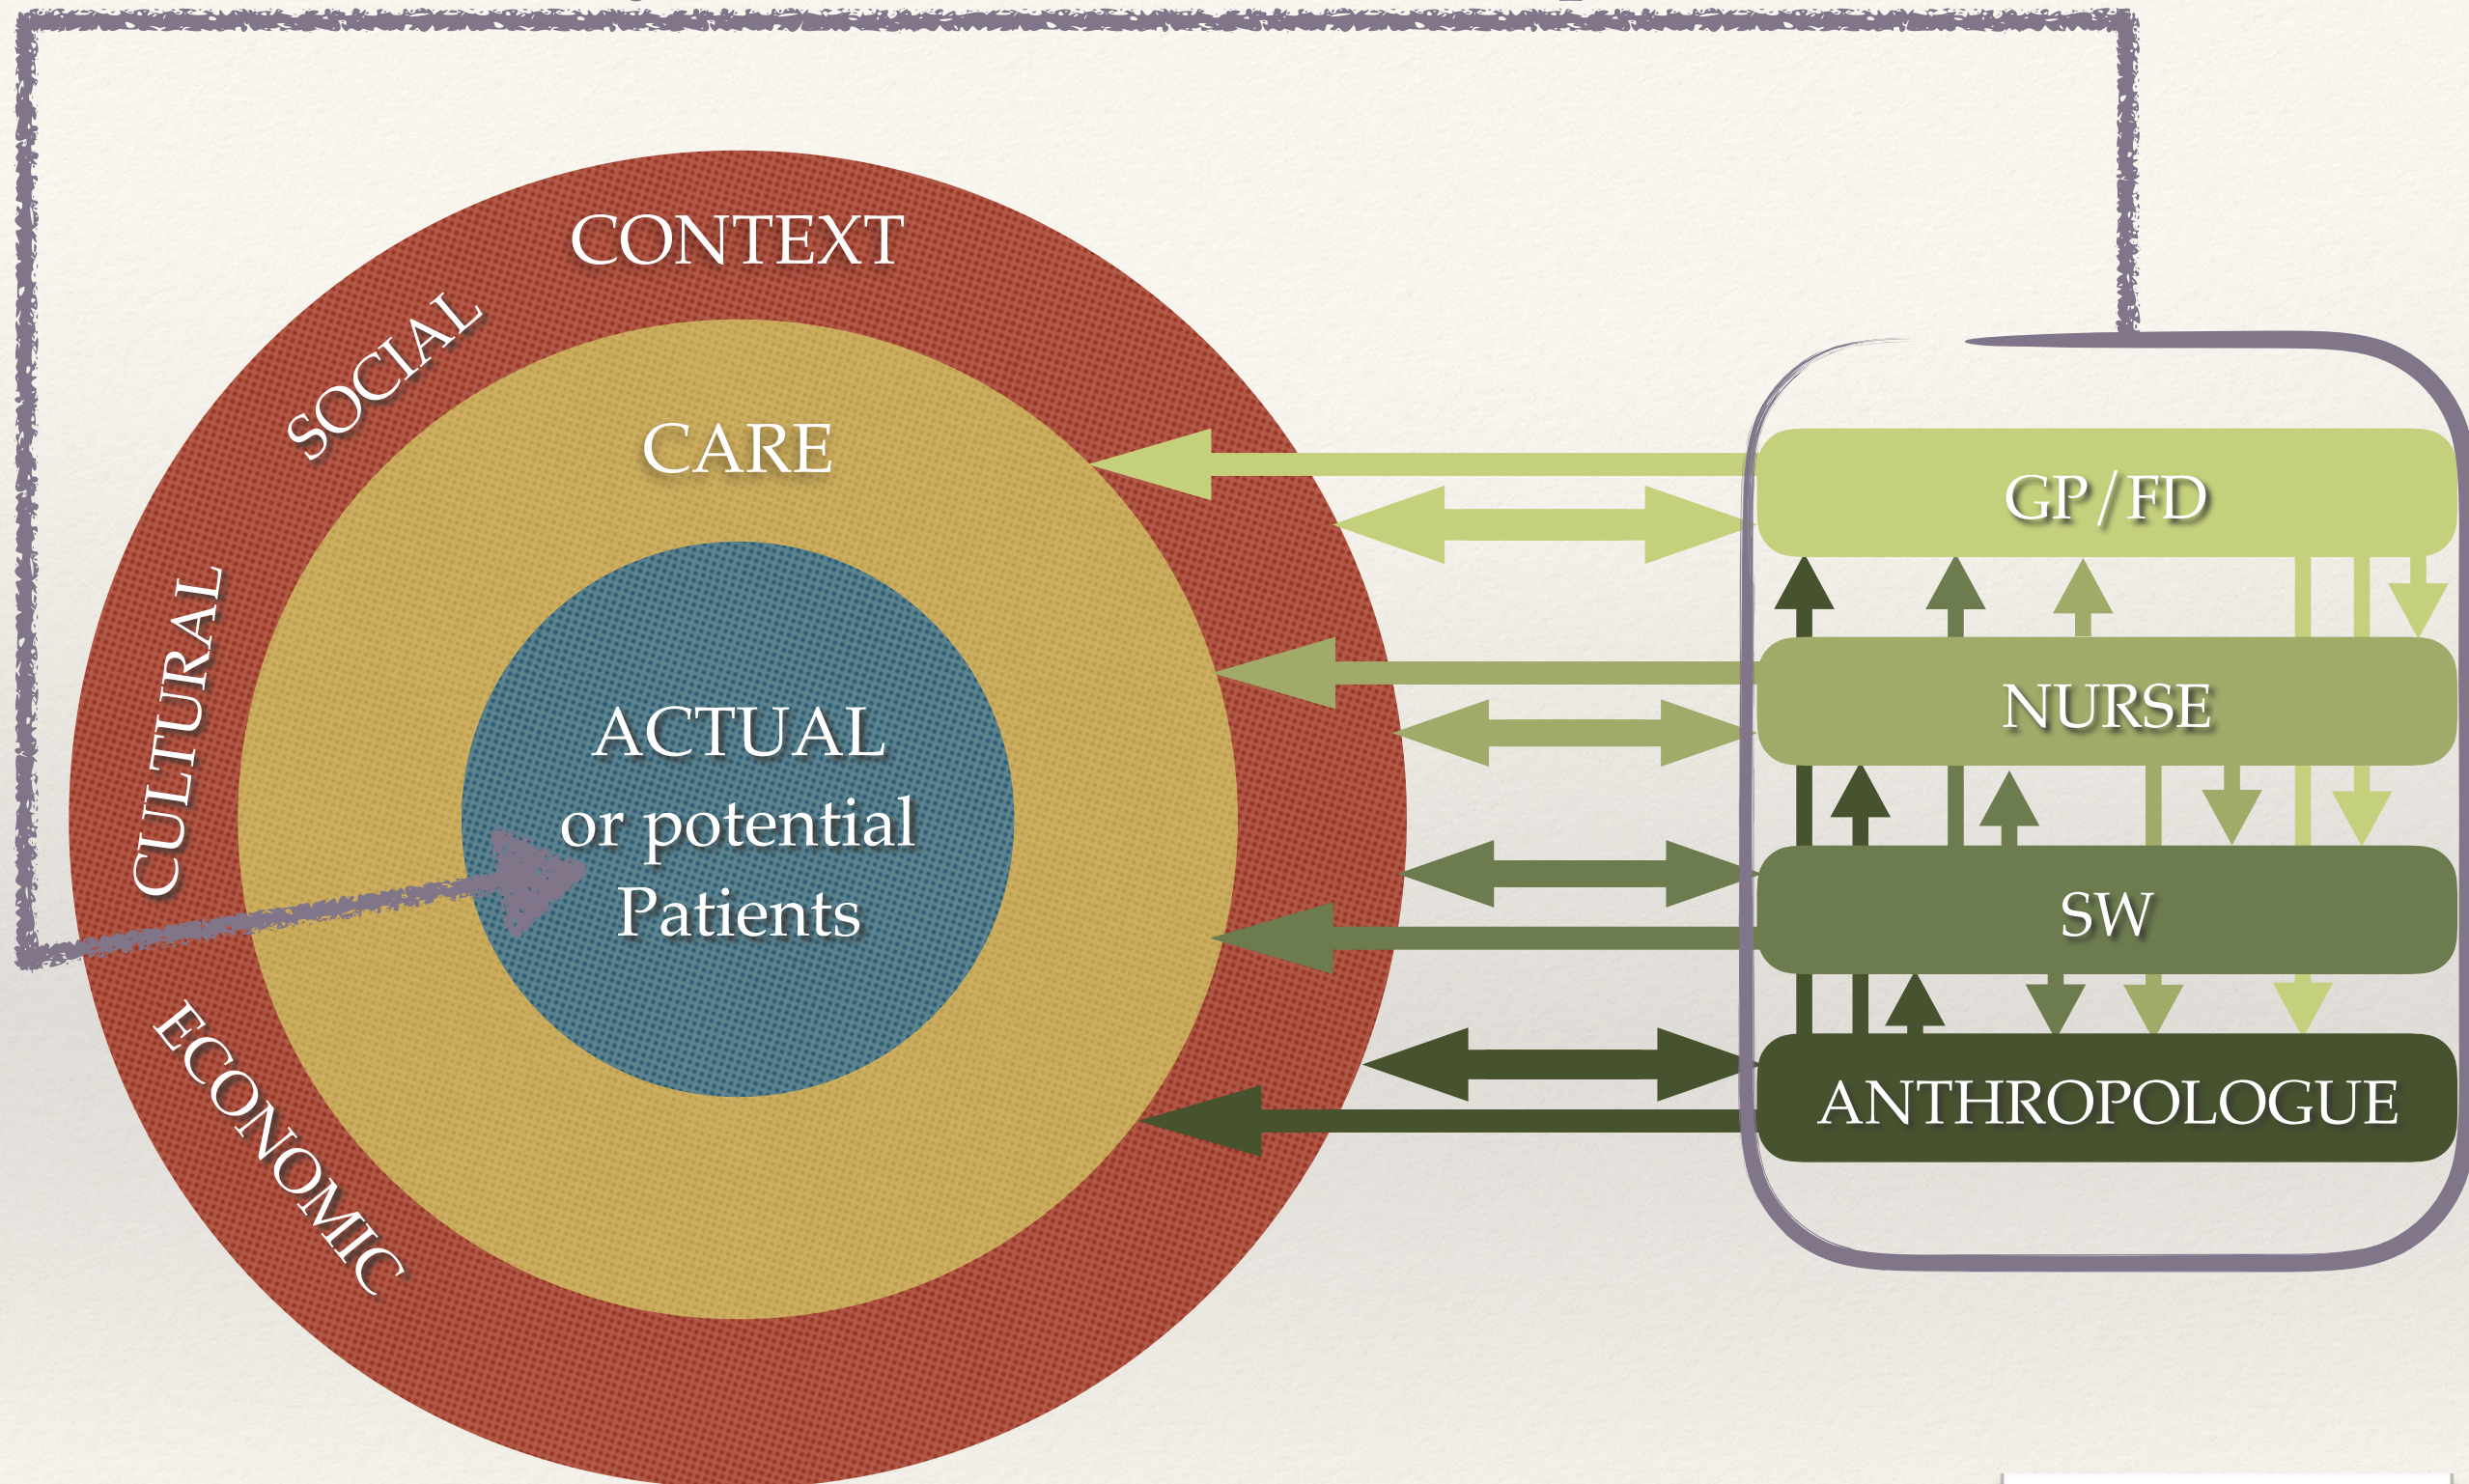

---

- ❖ The knowledge of socio-cultural representations on the health of our patients, and their behavior, is complex.
- ❖ A multidisciplinary approach involving :
  - ❖ physicians
  - ❖ anthropologists
  - ❖ nurses
  - ❖ social workersis a necessity.

# Necessary for QUALITY CARE of patients

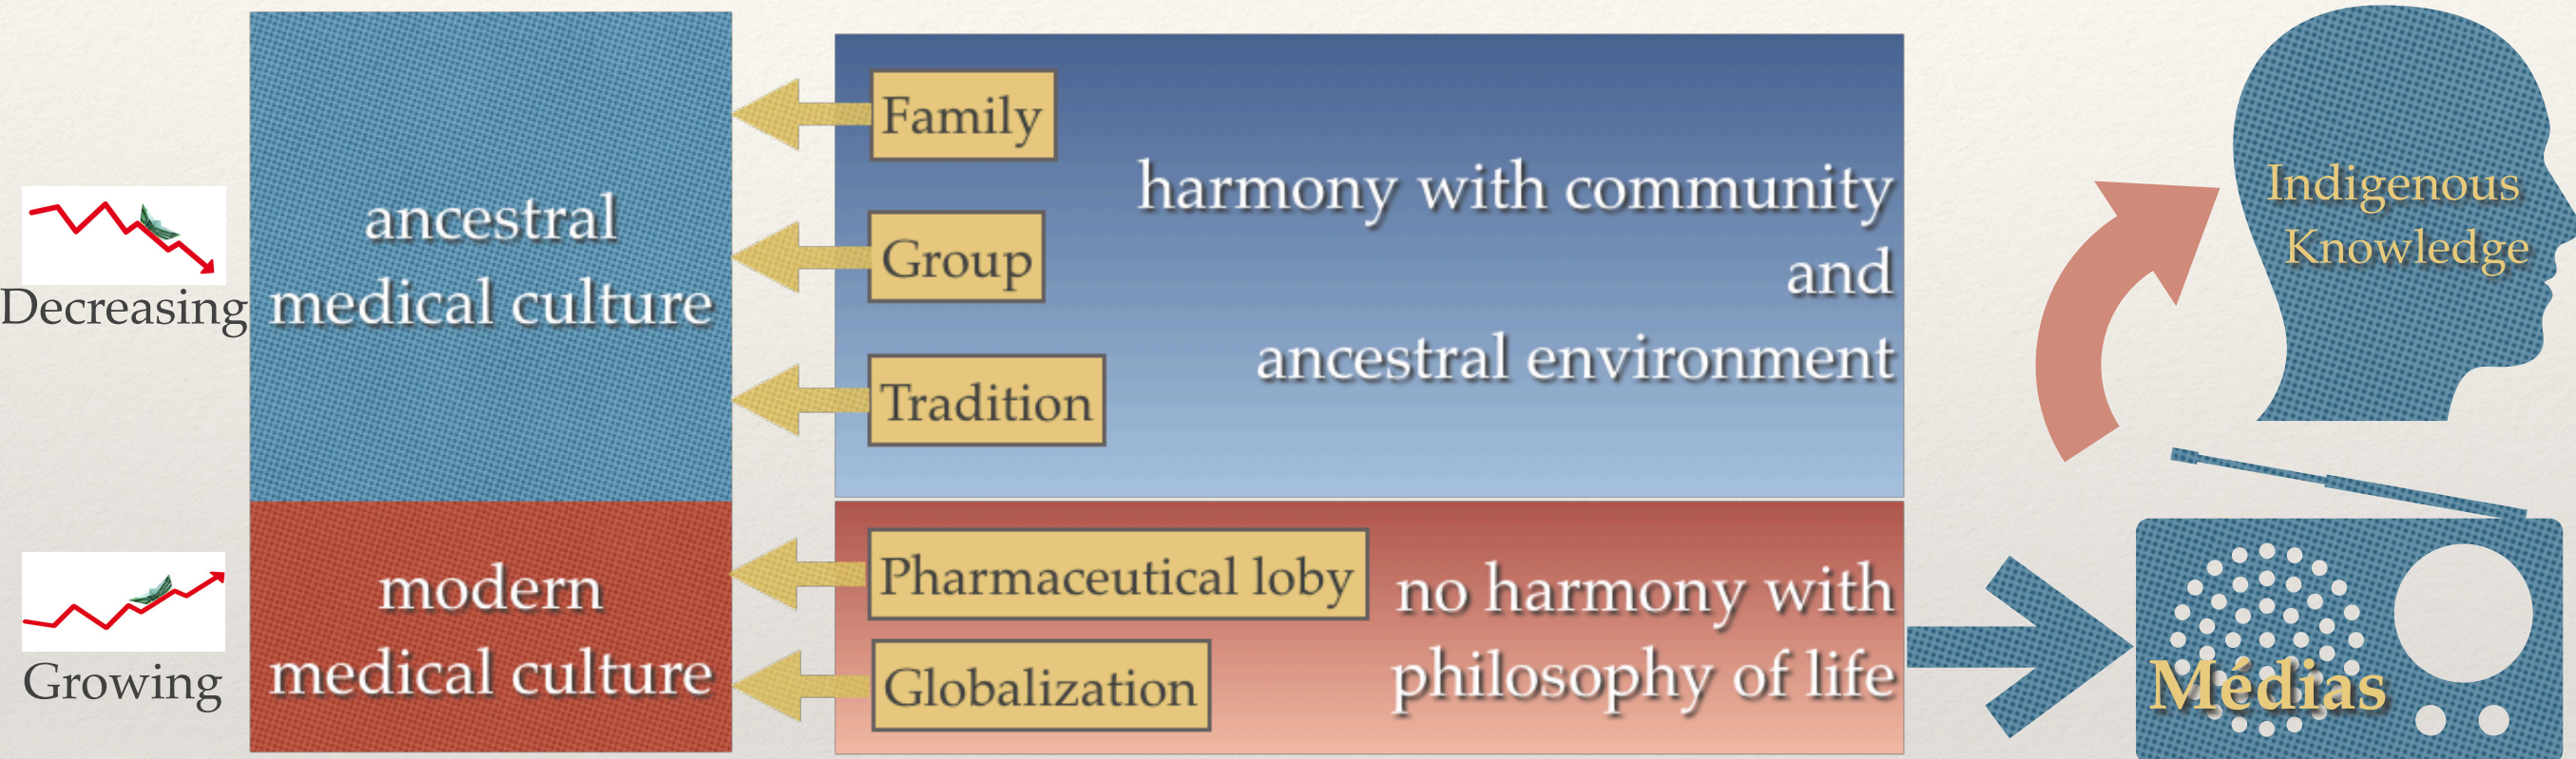

# Tribal medical paradigm

*Health defines human and the overall structure of his/her existential, moral and physical experience as well as his/her judgments and actions*

# Tribal medical paradigm

We must retain Indigenous Knowledge

- ❖ Highlight benefit
- ❖ Highlight relevance
- ❖ Know the limits
- ❖ Encourage its transmission
- ❖ Protect it from plunder

Pluri Professional  
Anthropological Approach  
is a way to understand

the changes of Tribal Health management.

How long will Indigenous knowledge persist ?

Is this an announced death of this knowledge

or

is it a normal and contextual evolution of knowledge ?

Thank You
